

GDM SCENIC stone

The exclusive GDM.SCENIC stone large size slabs system combines a discrete geometry with linear shapes, refined surfaces and contemporary technology. With specific aesthetical qualities, GDM.SCENIC stone system is different from all concrete products. The finishing of the upper layer and its composition made with natural stone granula gives it an exciting and wonderful presence. GDM.SCENIC stone proposes more than 60 different dimensions and a very large range of colours.

The specific anchoring system guarantees that GDM.SCENIC stone is very appropriate for heavy traffic areas.

Discover more details, including photos, sizes, and color options, by downloading our brochure 'Perspectives 2.0'. For information about water-permeable paving and grass pavers, please follow this link to our 'Eco-friendly paving'....
