

Tactile slabs

We produce custom concrete tactile slabs dedicated to a safer urban environment and we are very good at it. Our tactile slabs are very smooth, have a nicer finish than pressed concrete slabs, are affordable, resistant to time and come in different dimensions and finishings. Dimensions, corners, patterns may vary depending on countries requirements. Contact us for your specific country. Smart!: We can add LED in the slabs. We comply with EU and national norms and regulations for the lines and dots pattern, dimensions and heights.

Colours and Finishings

- ✓ STRUCTURE - TEXTURE
- ✓ VISIA

Measurements

- ✓ Custom rectangular slab with dots:
30-250x30-100x6-14 cm
