- ✓ Seating long with backrest and left and right siderest: 180x70,5x39 cm - 552 kg

Bench system designed by Architecten Achtergael This concrete A-bench is a modular yet elegant object that exudes class and robustness while being functional and sculptural in any indoor or outdoor environment. We start from 3 types of base pieces with a length of 60, 90 or 180 cm. On top of these pedestals you can choose between different cover stones that form the final bench....
