

The exclusive SCADA large size slabs system combines a discrete geometry with linear shapes, refined surfaces and contemporary technology. With specific aesthetical qualities, SCADA system is different from all concrete products. The finishing of the upper layer and its composition made with natural stone granula gives it an exciting and wonderful presence. SCADA proposes more than 60 different dimensions and a very large range of colours. The specific anchoring system guarantees that SCADA is very appropriate for heavy traffic areas.
