

Passage

Location: Westkerke (BE)

Public Space

Project details

"Passage" is a nice installation in a small city in the north-west of Belgium, close to the coast. This project is astonishing due to its unusual green and white colours for concrete, its elephant skin structure for the benches, the slabs and the roof elements. Also it has smooth half round bollards that seem to float above the ground and individual seats K02 from our designer Sofie Boonman.
