FIORD range, design by Markus Kurkowski

FINOCRETE COLLECTION

the new range of UHPC furniture

The Finocrete Ultra High Performance Concrete (**UHPC**) Collection begins a next chapter in the always ongoing product development by Urbastyle.

This collection is specially designed for and with Urbastyle by designers from all over the world.

Finocretes' potential for slim and more durable design for urban and architectural applications is tremendous, and gives architects and consultants more freedom than ever in the design of their projects.

Products are available in polished, silky and vellum finish.

Check this out!

UHPC

Ultra High Performance Concrete is great for the design of more slender and durable products.

UHPC incorporates structural synthetic micro fibers in mass and has micrograde aggregate, allowing the production of very resistant and lightweight elements.

UHPC can present non uniform cloudy effects of colour and hair cracks, which are characteristic aspects of this material.
